Profile

As an experienced Full Stack developer, the goal is paying close attention to detail and stay up-to-date with the latest trends and best practices

Work Experience

SOFTWARE DEVELOPER

Pazl Infolyte 2024 Nov - Present

Collaborated as a junior developer on building an insurance product and other service-based projects, contributing to React and Angular frontend, and Node.js, Express, MS SQL Server backend development

FULL STACK DEVELOPER

LevelX 2023 Jul - 2024 Oct

Collaborated as a junior developer to build a student management tool, contributing to Angular frontend and Node.js, Express, MongoDB backend development.

Full Stack Developer

Freelance 2024 Feb - 2024 May

Delivered a high-quality inventory management application as a freelance full-stack developer, using Angular, Node.js, Express, and MongoDB to build responsive and interactive web interfaces

Projects

DOFR

DOFR is a comprehensive insurance platform designed to empower clients to efficiently create, manage, and monitor insurance contracts, track detailed policy information, receive timely updates, and seamlessly access a wide range of insurance services through a highly intuitive and user-friendly interface.

PackWorkX - ERP for Packaging Manufacturers

Worked on the frontend of a modular ERP system, building interfaces for sales orders, work orders, production planning, inventory, and invoicing modules. Integrated APIs and implemented responsive, user-friendly interfaces.
